

Synopsis

- **Name of the app:** Janta ki Aawaz (May be changed at a later stage)
- **Name of the department /sector:** District Administration.
- **Target Audience:** General Public
- **Objectives:** To provide a Platform to the general public to voice their area specific requirements which may be considered for development decisions at a later stage by the district administration. The Users after Registration will be able to choose the domain of requirement (Education, FCS&CA, RDD, Social Welfare, PwD, PDD, PHE or Health) and submit the details about their requirements (ie requirement of School, repair of road, supply of water etc) which will be available to the admin user facilitating him/her to take developmental decisions accordingly.
- **Benefits to the end-user:** The users after registration will be able to put forward their requirements through the comforts to their homes without moving pillar to post and their requirements may be used for deciding the area wise priority sectors for development activities and the administration will also be getting the real time requirements of the General public specific to a particular area facilitating the administration to promptly work on the requirements.
- **Platform / Technology to be used:** Flutter Dart/ MySQL PHP
- **Any other information you may like to give:** The mobile app will be used to gather the on field requirements from the citizens and all those area specific requirements will be present to the admin facilitating them to identify the key priority areas which need attention. This will in turn not only ease the general public in voicing their demands, it will also facilitate the district administration in finding the key priority areas which need attention specific to a particular area or the district as a whole.
