NATIONAL INFORMATICS CENTER, KUPWARA
JAMMU AND KASHMIR

(Mobile Application Synopsis)
Mobile App Development Challenge for Districts

Name of the Mobile App

Yet to be decided

Name of the Department/Sector

Social Welfare and Education Department

Objective

The main objective of the Project is to make citizen centric mobile application, which will create a single window interface to provide information on various scholarship Programs/Schemes to the student.

Target Audience

Students.

Benefits to the End User

This mobile application will help in the dissemination of information (like opening and Closing Date of the application, Eligibility, How to Apply and Required Supported Documents) of various District/State/Centre sponsored scholarship Programs/Schemes to the stakeholders/Students.

Therefore, students will be able get in time information of the scholarship, for which they are/will be eligible.

Platform/Technology to be used

Platform for development: Android
Framework to be used: Flutter
Database to be used: My SQL
IDE for development: Android Studio
